

## We could be good for your letters: 7 reasons to ditch the stamps!

### STAMPS

They cost more!

They run out at inopportune moments!

They have to be applied by hand

Hard to tell if you have applied the right number of stamps, so you add another...just to make sure!

You can never be completely certain your letter was delivered at all!

You have to buy them at the post office

They can't promote your brand

### FRANKING

You can save money on every 1st and 2nd class letter you send through a franking machine. Discounts can reach up to 28 pence per letter. So why pay more?

Load it with sufficient credit for normal usage, add more if you have an abnormal mail volume outgoing, so you will never run out!

Your franking machine means no more sticking by hand. You can even add a feeder so you can whiz your mail through in no time at all

Don't pay more than you need to, weigh the item and use the size guide and you will never over or under price again.

Your franked impression will include your return address this means that Royal Mail have to return your letter if it is undelivered

From the comfort of your office you can recredit your machine with Frama 24 7

Create a good impression and use your frank to promote your company logo
