

## Frama Launches New Automatic Letter Opener

Frama UK has recently launched a high volume letter opener named Access B400. Capable of opening up to 400 letters per minute, the B400 is a perfect opening solution especially for organisations that have a high volume of incoming mail. The B400 like the smaller Frama Access B300 slits the envelopes rather than cutting which means that no paper waste is generated. The B400 can stack up to 8cm high and can take up to 10 mm thick envelopes and it will accept letters up to A4 size. The B400 will auto start and stop, simple to set up and ready to open the mail day after day.
