

FRAMA F-SHRED TS

INDUSTRY LEADING TOUCHSCREEN SECURITY SHREDDERS

PROTECT PRIVATE AND CRITICAL COMPANY DOCUMENTS AT THE TOUCH OF A BUTTON

The Frama F-shred TS range uses high quality shredding technology for the safe disposal of sensitive documents and information.

These industry-leading shredders are designed for a broad array of applications. Our shredders are packed with innovative attributes and proprietary technology that differentiate them from the competition. Features such as smart energy management, jam proof operation, safety sensors and precision engineered cutting knives, to name a few, set Frama apart from the crowd. Not to mention, its ergonomics and design make it a pleasant addition to any office or personal space.

From routine personal shredding to highly confidential data destruction, Frama's comprehensive product line has the right shredder for the job.

ENERGY SMART software manages energy consumption detecting when the shredder is not in use and automatically activating the power save stand-by mode. Although only a small amount of energy is saved, over a year with standard use, Energy Smart can save up to £20 per year on energy costs and prevent up to 65kgs of Carbon Dioxide from entering the atmosphere.

24 HOUR CONTINUOUS MOTORS The shredders can be operated for any length of time without interruption by long and inconvenient waiting time due to overheating. Maximum daily shredding capacity is guaranteed, and is not affected by the Duty Cycle concept (time of operation vs. cooling time to prevent damage) which is typical of most other products on the market.

AUTOMATIC REVERSE SYSTEM is a special system which can detect the thickness of the paper entering the shredder and automatically reject the paper in case the paper capacity has been exceeded and a jam is about to occur. This feature not only prevents paper jams but also protects from potential damage to the metal teeth.

STEEL DRIVE SYSTEM provides many years of trouble and service free operation. Special carbon hardened steel gears and metal chain drive system ensure operational reliability and resistance to stress and misuse. Unmatched by the more economical and common transmissions made with plastic gears which are found in most products on the market.

TOUCH, SHRED.

TOUCHSCREEN SHREDDERS

The touchscreen series of shredders are available in three options F-Shred Essential TS, Expert TS and Pro TS.

All three have special carbon hardened steel gears, continuous 24 hour operation, energy smart status, automatic start/stop function and automatic reverse system.

The entry level F-Shred Essential TS will shred paper and multimedia items including CDs and credit cards with no problems.

The F-Shred Expert TS shreds paper and multimedia items with a finer cross cut for increased security.

The F-Shred Pro TS shreds paper to the finest possible cross cut for maximum security. This units has "Nato ready" status.
