Welcome

To access the RMail track, prove, sign and encrypt platform through Microsoft Outlook (desktop), users may download the RMail App either locally on their machine or through terminal services. A new button is added to the email compose page allowing the sender the option to “Send” as they currently do or “Send Registered” on demand.

This document outlines the software installation and deployment options for both single and multiple computers running Microsoft Office (desktop). See the RMail Apps Marketplace for Office 365 Online and additional Apps.

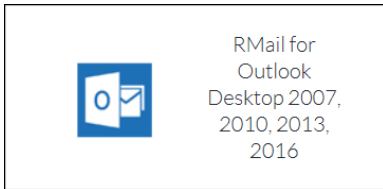

System Requirements

System Area	Details
Windows version	Vista, 7 (32/64 bit), 8 (32/64 bit), 10 (32/64 bit)

Outlook Desktop App Installation

To install the RMail App for Outlook Desktop onto a Windows computer please follow these steps:

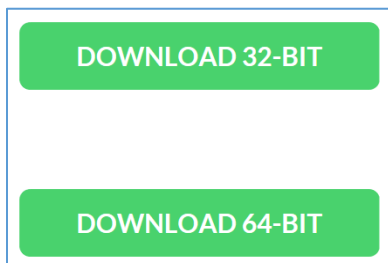

1. Ensure you have **Administrative Rights** with your computer
2. Close Outlook
3. Uninstall any previous versions of the RMail App for Outlook from **Add or Remove Programs**
4. Open the RMail Apps Marketplace: <https://www.rmail.com/apps/>
5. Select **RMail for Outlook Desktop**

6. Confirm the **bit** version of Microsoft Office
 - a. Open Outlook
 - b. Press **File**
 - c. Press **Office Account**
 - d. Press **About Outlook**

7. Select the **bit** version of your Microsoft Office program

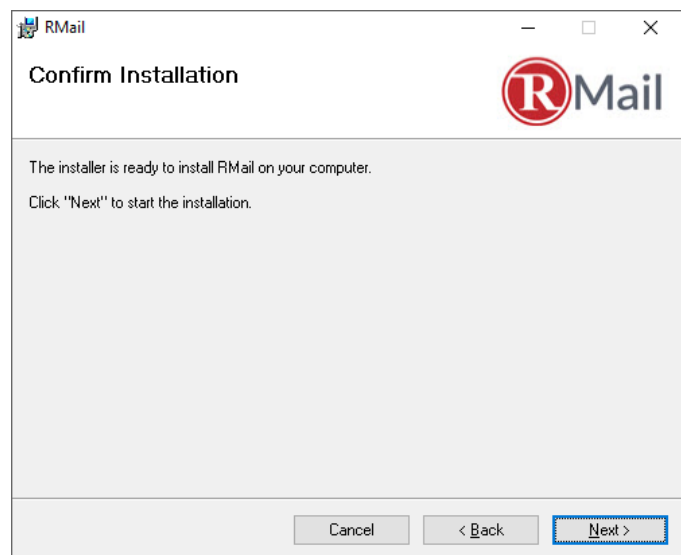

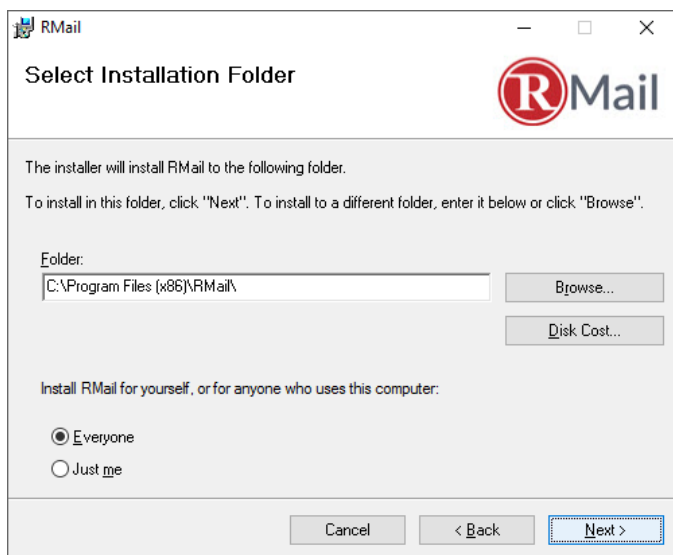

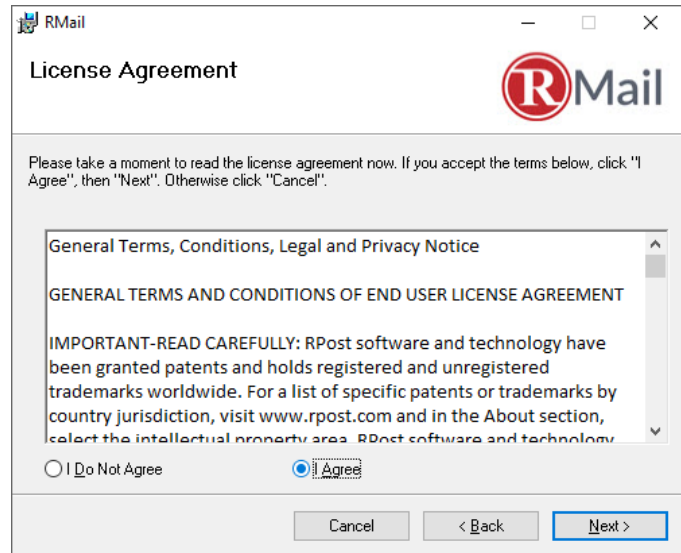

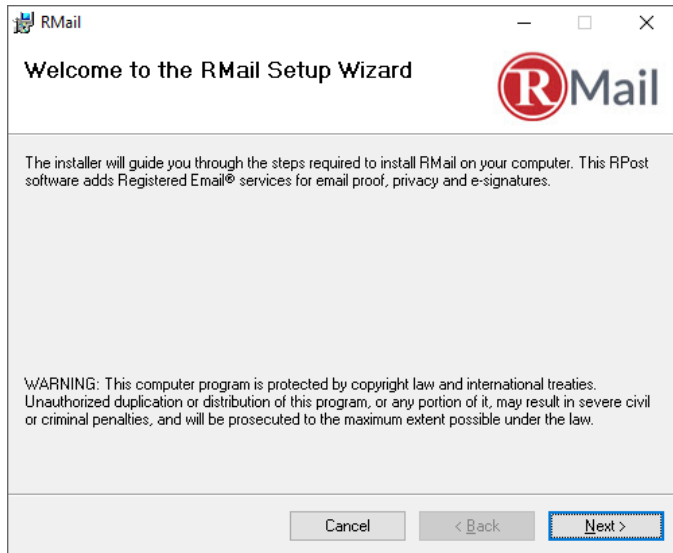

8. Click **Download Now**

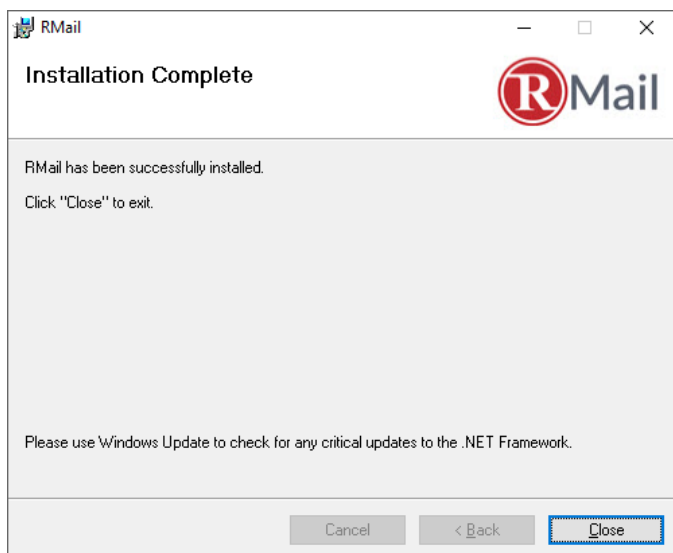

9. **Save** and **Run** the installation file
10. Follow the installation instructions

Installation Wizard

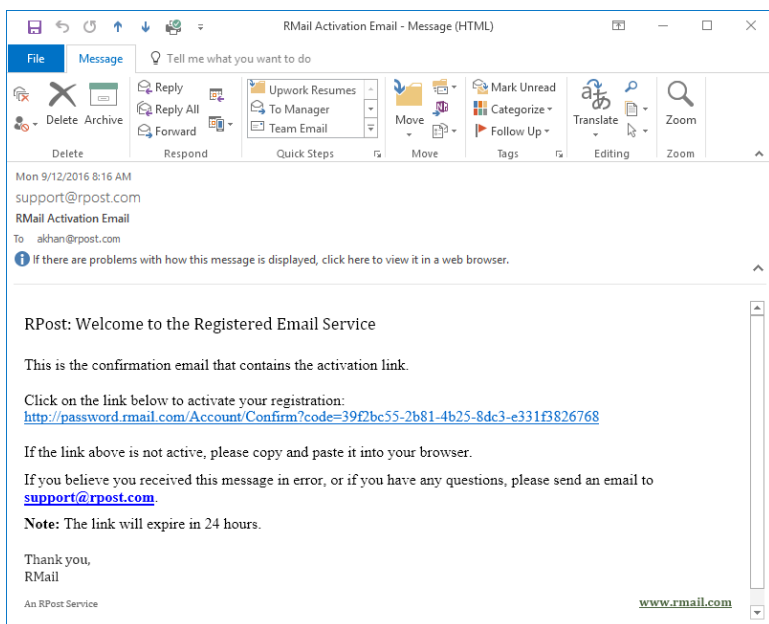

Note: The installation folder for x64 bit machine would be different.

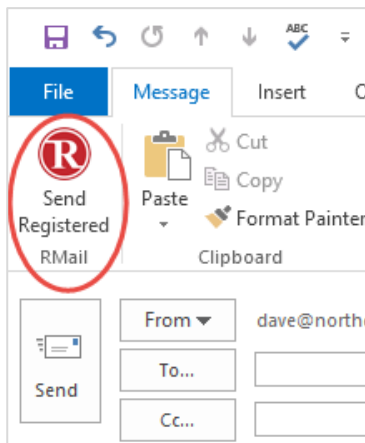

One-time Registration

1. Open Outlook
2. Complete the required one-time registration process for the RMail service necessary for these processes:
 - a. The RMail App for Outlook uses a token to verify the identity of the sender for added security.
 - b. The LargeMail, Large File Transfer service, uses an asynchronous web services connection to securely upload the to the RMail Cloud. The one-time log-in is required to confirm the identity of the sender using this feature.
3. The registry is written when the MSI is run during installation. If the App is pushed out to multiple users, the registration wizard appears when the user starts Outlook with the Add-in running if the user is not already registered.

- Open Outlook and click the activation link in the RMail Activation Email sent from support@rpost.com. If you do not see the activation email in your inbox, please check your junk mailbox

- Your account should now be active to use the RMail plugin
- Press **New Email** and make sure you have the new, **Send Registered RMail** button

Note: The registration wizard will appear on Outlook startup. It will continue to appear on startup until the user registers. If they press Cancel the wizard won't reappear until they either restart Outlook or try to use some RMail functionality.
